MOBILE **INFORMATION** EXCHANGE

## DO YOU WANT TO

### Self-manage and protect your drivers, vehicles and contents?

FM-Protector's accurate satellite positioning (GPS) and extensive wireless data communication coverage (GPRS) keep you informed as to your vehicles' location. Sophisticated security sensors aid in detecting theft or tampering. You and specified recipients are immediately notified by SMS or e-mail when set events are triggered, such as alert button pressed, low vehicle battery, over speeding, entry into no-go areas and out of hours driving.

### Increase your business' efficiency and customer service?

FM-Protector can track your vehicles' whereabouts in real-time. Know which vehicle is closest to a customer to improve customer service and savings in travel costs. Drivers are deterred from moonlighting, helping ensure your business runs efficiently and profitably.

### Monitor the safety of your Employees or Partners?

As a concerned employer, parent or family member you can keep track of those on the road, providing reassurance that they are driving responsibly or have arrived safely. Monitor their driving online or receive automatic SMS or e-mail notification when the remote alert button is pressed, or when potentially dangerous driving is detected.

Monitor out of hours private usage of company vehicles to protect employers from having to pay Benefit in Kind demands on their employees behalf.

## AND YOU WANT

- an easy-to-use solution at an affordable price
- a pay-as-you-go price plan
- to pay only for services you use, when you use them
- a simple, non-intrusive installation

### Then FM-Protector is your solution!

A lifestyle product that provides all of the above, as well as other useful features and services designed to make driving more productive, safe and enjoyable.

## Automatic theft and tow-away detection.

Built-in security sensors detect possible theft, tamper and tow-away occurrences. Immediate SMS or e-mail notifications are sent to your contacts list.

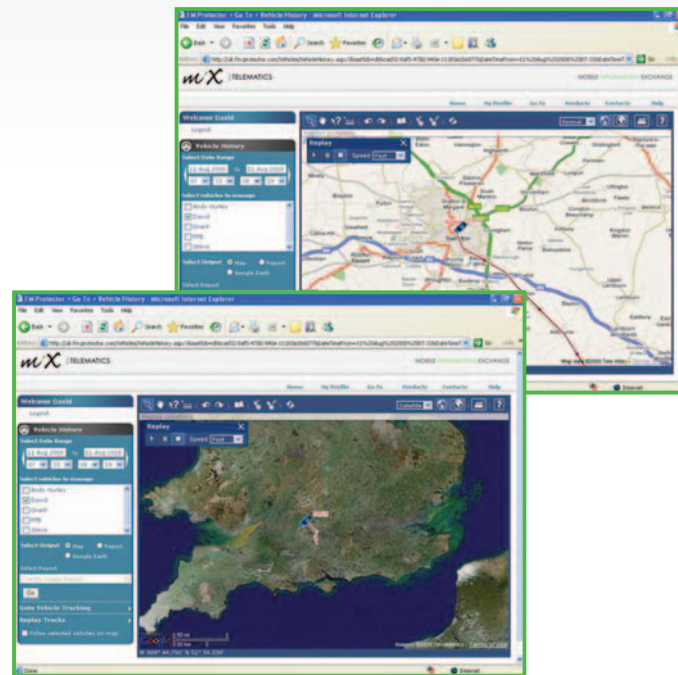

## Self-testing

Test your FM-Protector system at any time. Testing can be initiated using your remote control, cellular phone or via [www.fm-protector.co.uk](http://www.fm-protector.co.uk). Test results are available online and are sent via SMS and/or e-mail.

## Vehicle Movement Reports

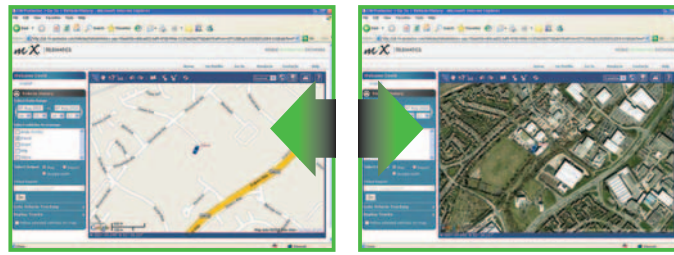

Replay historical trips with our detailed online maps or download trip information and review all vehicle movements in report form. Reports can be exported to Excel, PDF, HTML, TIFF, CSV and XML formats.

## HOW IT WORKS

Never has tracking your vehicles been this convenient or user-friendly. You can access vehicle information from any internet-enabled computer or cellular phone, from anywhere in the world. FM-Protector requires no special software; vehicles are tracked, managed and monitored on [www.fm-protector.co.uk](http://www.fm-protector.co.uk).

**Track vehicles** using detailed street-level online maps or Google's satellite maps. Powerful map tools offer a variety of useful functions. Search for street addresses and places of interest such as ATMs, hospitals and restaurants. Mark routes, highlight areas, set geofences, generate print-friendly maps and more.

“Switch seamlessly from street-level to Google maps.”

**Select and customise events** to send SMS or e-mail notifications to multiple recipients. Events include alert button pressed, over speeding, vehicle battery low, out of hours driving, geofence activations, theft and tow-away detection.

The position of your vehicle is recorded using GPS technology and FM-Protector uses the **GSM** cellular network to communicate vehicle positions to central servers on a regular basis. FM-Protector is built to the highest internationally acclaimed automotive quality standards at an ISO/TS 16949 and ISO 14000 approved manufacturing facility.

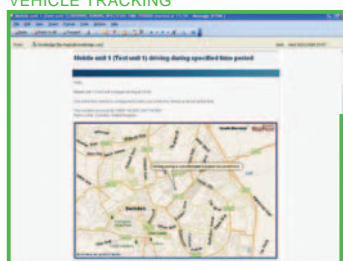

## EASY & CONVENIENT

FM-Protector requires no special additional software, but you will need a browser such as IE version 6 or later and you will require a flash player to view the home page content. Reports and screens are easy to read, understand and use.

The latest available information is shown when you logon to [www.fm-protector.co.uk](http://www.fm-protector.co.uk). Select a specific vehicle or display multiple vehicles on a map and replay historical vehicle movements. FM-Protector is ideal for small fleets and families.
